One day, a selfish fox invited a stork for dinner. Stork was very happy with the invitation – she reached the fox’s home on time and knocked at the door with her long beak. The fox took her to the dinner table and served some soup in shallow bowls for both of them. As the bowl was too shallow for the stork, she couldn’t have soup at all. But, the fox licked up his soup quickly.

The stork was angry and upset, but she didn’t show her anger and behaved politely. To teach a lesson to the fox, she then invited him for dinner the next day. She too served soup, but this time the soup was served in two tall narrow vases. The stork devoured the soup from her vase, but the fox couldn’t drink any of it because of his narrow neck. The fox realised his mistake and went home famished.

Exercise helps children to vent out their excess energy in the right way. Most children feel calm and relaxed after exercising.

It's no news flash that kids need exercise in their lives.

In fact, we're all probably pretty aware of the fact that increased physical activity helps children build healthy bodies and prevent chronic disease. And we also know that helping our kids to love movement sets them up to be stronger and healthier teens and adults.
